Professional Summary

MERN Stack Developer with 1+ year of experience delivering 4+ production web applications in ed-tech, travel, and fintech/retail domains. Proficient in REST API design, JWT authentication, RBAC, Razorpay and Cashfree payment integration, and real-time systems via Socket.io and WebRTC. Shipped solutions serving 5,000+ users with zero critical security incidents across all deployments.

Professional Experience

MERN Stack Developer

FlyAnyTrip

Vadodara, India
Apr 2025 – Present

- Spearheaded full-stack MERN application development for ed-tech, travel, and retail checkout products, with architectures built to support 5,000+ concurrent users.
- Engineered 20+ REST API endpoints with JWT authentication and RBAC, achieving zero unauthorized access incidents across all production systems.
- Streamlined Razorpay and Cashfree payment gateway workflows with end-to-end invoicing, reducing manual billing effort by ~40%.
- Tuned 5+ MongoDB aggregation pipelines and query indexes, achieving ~20% reduction in API response times across core endpoints.
- Orchestrated deployment of 3 production applications on Vercel and Render, maintaining 99.9% uptime SLA across all live services.

MERN Stack Developer Intern

FlyAnyTrip

Vadodara, India
Jan 2025 – Mar 2025

- Constructed 10+ responsive UI screens and reusable React components using JavaScript, Hooks, and Context API for the TripEasy travel platform.
- Collaborated with a 4-member engineering team on booking flows and user-facing modules, consistently meeting delivery timelines.
- Refactored 3 backend service modules using REST APIs with MongoDB schema design, enhancing application functionality on Vercel/Render.
- Promoted to full-time MERN Stack Developer within 3 months based on technical performance and consistent on-time delivery.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Context API, React Hooks, Material UI

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Socket.io, WebRTC, Webhooks, Nodemailer

Database: MongoDB, SQL, PostgreSQL

Tools & Deployment: Git, GitHub, Postman, Vercel, Render

Concepts & Integrations: RBAC, Authentication & Authorization, Real-Time Applications, Performance Tuning, Razorpay, Cashfree, QR/NFC, AI Integration

Projects

TripEasy – tripeasy.in

Mar 2025 – Jul 2025

React.js, Node.js, Express.js, MongoDB, Cashfree, REST API, Material UI

- Launched a full-stack travel booking platform serving 200+ users, enabling destination browsing, package booking, and secure Cashfree payment processing.
- Architected a 3-step customized itinerary request workflow where users submit travel preferences, admin reviews proposals, and confirmed bookings trigger invoice generation.
- Slashed booking management overhead by ~35% through structured REST APIs, MongoDB-backed data workflows, and end-to-end invoice processing.

ScanTapPay – scantappay.flyanytrip.com

Aug 2025 – Nov 2025

React.js, Node.js, Express.js, MongoDB, Razorpay, QR/NFC, Nodemailer

- Deployed a contactless retail checkout platform using QR codes and NFC tags, achieving sub-2s scan-to-purchase transaction completion for 100+ daily checkouts.
- Executed Razorpay payment processing with 100% transaction accuracy and instantaneous digital receipt delivery via Nodemailer on every approved charge.
- Rolled out an Admin Dashboard supporting real-time stock management, order invoice viewing, and invoice re-delivery to corrected customer emails.

BiologyTrunk – biologytrunk.in

Dec 2025 – Feb 2026

React.js, Node.js, Express.js, MongoDB, Razorpay, JWT, RBAC, Tailwind CSS

- Spearheaded a full-featured LMS for 500+ biology students with 3 role-based dashboards (Student, Faculty, Admin), course creation, and enrollment management.
- Enabled faculty to publish 4 content types (notes, Google Drive links, live class URLs, recorded sessions) with a polling-based notification system alerting enrolled students on new uploads.
- Enforced JWT-based RBAC across all user roles and processed course payments via Razorpay with PDF receipt generation, cutting manual admin tasks by 30%.

Additional Projects: ConvoChat (Real-Time Messaging, WebRTC, Socket.io, 50+ users), Employee Management System (AI Face Recognition, Attendance Tracking), ShopEase (E-Commerce)

Education

Bachelor of Technology in Computer Science & Engineering

Parul University, Vadodara

May 2025
CGPA: 7.80/10

Certifications & Training

- Software Engineering Certification
- byteXL Industry Internship Program (Apr 2024 – Jun 2024)
